Super Smart Evolution (SSE)

Annotation:

The SSE (Super Smart Evolution) token is a digital asset created to reward participants in the site surfing program on the SSE platform and has many capabilities for use in various blockchain applications, including telegram bots, etc.

It has all the properties of the TON cryptocurrency.

Token address:

Bounceable: EQASSL4LRRCOkS5jCNQiWgMsF_pPtgk9ETVkA24KdZby98Uh Raw: 0:1248be0b45108e912e6308d4225a032c17fa4fb6093d113564036e0a7596f2f7

Token name: Super Smart Evolution – 11/27/2023

Token Ticker: SSE

Main Features of SSE:

Surfing Rewards: Members by viewing and interacting with advertising content on the platform earn SSE tokens. Each ad interaction is compensated with SSE tokens.

Affiliate Programs: SSE is used in affiliate programs to reward members for bringing new users and advertisers to the platform. Additional tokens can be earned through effective partnerships.

Exchange and Withdrawal: SSE is an exchangeable asset that participants can exchange for other cryptocurrencies or withdraw to their wallets. This provides flexibility and accessibility for use outside the platform.

Incentives for Participation: SSE acts as an incentive for active participation in surfing sites. The more active the participant, the greater the reward in SSE tokens.

Decentralization and Security: SSE is based on blockchain technology, providing decentralization and a high level of transaction security.

Multidirectional Use: SSE can be used not only on the surfing platform, but also in other blockchain applications on TON, as well as telegram bots, expanding the ability of token holders to participate in various ecosystems.

Democratic Governance: SSE token holders can vote on important decisions regarding the development of the platform and the characteristics of the token.

The SSE token not only provides participants with rewards for activities on the surfing platform, but also opens up a wide range of opportunities in various blockchain applications, emphasizing its versatility and applicability.

Token distribution

The SUPER SMART EVOLUTION (SSE) ecosystem on the TON blockchain is a unique economic model with the SUPER SMART EVOLUTION (SSE) token. With a total supply of 100,000,000 tokens, distribution is as follows:

5,000,000 tokens - ICO.

Address:UQBaa4I61Yq9epRA5SuWIzI9RwyfE6RXfVYZn7UT5yC67QtV

35,000,000 tokens - Distribution of tokens on the SSE platform.

Address: UQB_HKP5fHXj7NdGD3IpmrL5tU0VGGZ-Brldxi5mw6ithLVs

45,000,000 tokens - Listing on decentralized exchanges (DC), payments to holders, bonuses, staking pharming programs.

Address: UQD0Z rNRc KtFlcpmGWAXc-210cXpLrlvqhrY10tFS67hUj

5,000,000 tokens - Marketing and partnerships.

Address: UQBWZxIIPzSL9nXx1wGq01XqGLeFbojMsezy9AxcdcEoZusF

5,000,000 tokens - Reserve Fund.

Address: UQCqi0SEGjrRISXLLEhoYYKO7EU_y46IP74G2by7jl0RdeXV

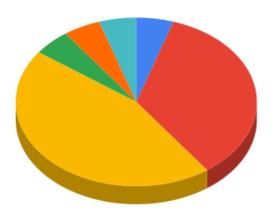

5,000,000 tokens - Team and founders.

Address:UQBE5CHAZtaBPT35WnZhQB43grOD290NrdEdNQL3KnoLbzlb

SSE Token Distribution

100,000,000 supply

- 5% ICO
- 35% affiliate payments
- 45% listing on exchanges,
- 5% Marketing and
- 5% reserve
- 5% team and founders

Deflationary Mechanism and Token Burning

To ensure long-term stability and growth in the value of the SSE token, a deflationary token burning mechanism is provided. The burn will continue until the project team and token holders hold a public vote to cancel the burn.

Every six months, tokens are burned in the amount of 10% of liquidity on decentralized exchanges. However, this burning may be canceled if the public vote against the burning reaches the necessary consensus.

Public Voting and Decision Process

A public voting process will be held among the project team and token holders. The decision to maintain or abolish the deflationary mechanism is made based on the voting result.

This mechanism is designed to ensure democracy and transparency in making key decisions regarding the economic policy of the project.

Conclusion

SUPER SMART EVOLUTION on the TON blockchain provides a unique opportunity to participate in an innovative ecosystem with a limited number of tokens and a democratic mechanism for managing the economy. The decentralized and flexible nature of the system ensures the stability and sustainability of the value of the SSE token.

This white paper represents the general concept and may be subject to changes and additions as the project develops.
